NCGA president discusses bringing profitability back to corn farmers

By TIM ALEXANDER
Illinois Correspondent

BLOOMINGTON, Ill. — The new and immediate past presidents of the National Corn Growers Association (NCGA) were in attendance at the annual meeting of the Illinois Corn Growers Association, held November 25 at the Illinois Corn Agri-Center. During a brief speech, new NCGA President Jed Bower, a corn grower from Washington Court House, Ohio, promised those in attendance, including former NCGA president and corn farmer Ken Hartman of Waterloo, Illinois, that he would make the rural economy and market expansion for corn his top priorities.

"We've got a big fight ahead, but I know that we at NCGA and all of you are ready for that," said Bower, who took over from Hartman on October 1 after serving the prior year as vice president of the organization's board and a member of several key NCGA committees, including the finance committee. He begins his presidency as corn growers face the largest three-year decline in net cash receipts in history due to declining crop farm profitability associated with lower prices and elevated input costs.

"Looking ahead at some of NCGA's priorities and my priorities for the next coming year, ethanol blends are at the top, but my true number-one priority is this: I want to bring profitability back to the American corn farmer. Ethanol is going to be a key to that. Hopefully we can get (year-round) E-15 soon, because we have to get to higher blends. Obviously, market access is (also) huge," said Bower, who is currently working to secure a full, 16-year extension to the U.S.-Mexico-Canada (USMCA) trade agreement.

The new NCGA president promised to tackle out-of-control input costs, especially for fertilizers. To that end, NCGA has established a special committee to examine drivers behind the continued rise in input costs, and ways to mitigate them.

Bower was effusive in his praise for the job Hartman did during his year as president, along with his assistance in helping him transition into the association's top leadership role. "Kenny has been such a mentor to me moving forward. In fact, my hair is starting to look a little like his," Bower said, grinning towards his silver-haired friend and colleague.

"Seriously, we've seen Kenny everywhere this year, pushing back on the administration, pushing back on MAHA; Kenny truly had no fear when it came to pushing the interests of the corn growers, and we appreciated that all across farm country."

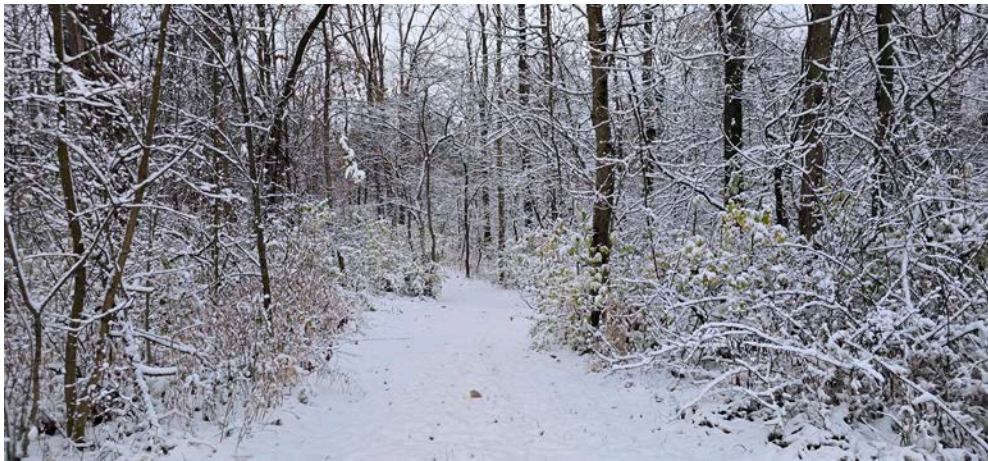

Following his brief address to ICGA leadership and members, Bower told Farm World there are a "couple of keys" to achieving his goal of returning profitability to corn farmers. "We have to keep pushing ethanol, we have to keep driving the export markets and bring this price up. We also have to look at the other side; what are farmers paying to put a crop out? It looks pretty high from our farm, so I want to make sure we have a balance between what we're getting out of our crop and what we're putting into it," he said.

Bower vowed to seek new ways to minimize the impact of monopoly-driven prices set by fertilizer, chemical and machinery companies. "We are getting gouged as the American corn farmer, it's not a fair practice, and I think we've got to bring a light to that," he said.

Increasing domestic ethanol demand in the short-term, another priority of Bower's and the NCGA, could depend on whether year-round E15 is pushed over the finish line by Congress and signed into law before the end of the year, according to Bower. "If we get E15 over the line, that's going to bring approximately another 2 to 2.5 billion bushels of corn out of the piles and into the gas tank," he said. "From there we have to continue to push to drive higher blends, look at a national high octane clean fuel standard and push ethanol around the world in the export market along with corn in all forms."

NCGA leaders have ramped up

Indiana's net farm income projected to rise this year but then fall in 2026

By Michele F. Mihaljevich
Indiana Correspondent

INDIANAPOLIS — Indiana's net farm income will increase this year, but is expected to drop in 2026, according to a report from Purdue University and the Rural & Farm Finance Policy Analysis Center at the University of Missouri.

This year's farm income is projected to be \$4.71 billion, up 45 percent from 2024, the report said. In 2026, farm income is expected to fall 34 percent to \$3.1 billion. The Fall 2025 Farm Income Outlook For Indiana was released in October.

"The expansion of 2025 net farm income is mainly due to increased livestock receipts and direct government payments," the report said. "Direct government payments are projected to total \$891.01 million. This is \$773.39 million higher than in 2024, mostly attributed to financial assistance to mitigate the effects of economic- and disaster-related losses in recent years, including 2024."

Crop receipts in 2025 are projected to decline 6 percent, driven by lower soybean production and lower corn prices, the report noted. Livestock receipts are projected to increase 14 percent, mainly due to higher cash receipts for eggs, hogs and pigs, and turkeys, the report said.

"The decrease in corn receipts is mainly driven by the projected 9 percent drop in average annual corn prices that offset higher production volumes with higher yields," the report said. Soybean receipts will decline "due to a 6 percent reduction in planted area and a 3 percent drop in soybean production. A 16 percent lower wheat price and 4 percent lower production in 2025 are the main drivers of the drop in cash receipts."

For livestock cash receipts, eggs are expected to increase 21 percent this year, while hog receipts are expected to go up 17 percent. Dairy receipts are projected to drop 2 percent, and receipts for cattle and calves are expected to increase 1 percent.

"The report correctly identifies government transfer payments for 2025 as a driver of net farm income," Dr. Todd Davis, Indiana Farm Bureau chief economist, told Farm World. "Some of these payments are included in the 2026 forecast, but at lower levels than in 2025. USDA had discussed a type of liquidity bridge for 2026 before the government shut-down. I am unsure of the likelihood of a bridge payment to help with 2026, but the liquidity concern remains an issue."

As for 2026, Davis said he's not surprised that net farm income is forecast to decline.

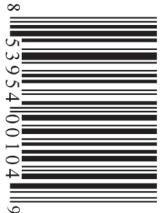

"The initial 2026 forecast assumes trend yields for corn and soybeans, which are lower than the record yields for the 2025 crops," he explained. "The 2026 price forecast reflects the September 2025 outlook, which was bearish for 2025 corn and soybeans, and that bearish sentiment carried into 2026."

"The forecast of lower prices for 2026 is reasonable, but weather events in Argentina and Brazil could reduce the size of the crops currently being planted. Smaller South American corn and soybean production would support higher prices for the U.S. crops."

In 2026, the report said corn receipts are expected to drop 3 percent due to lower production. Soybean receipts are projected to remain steady. Livestock receipts are expected to de-

USDA launches New World screwworm website to centralize data

WASHINGTON, D.C. – The USDA has launched the new unified New World screwworm (NWS) website, screwworm.gov. This site centralizes NWS information available across the federal government and reflects the government's effort to fight this pest through implementation of Secretary Brooke Rollins' comprehensive five-pronged plan.

"The Trump Administration is leading a whole of government effort to protect our nation's cattle industry from

the New World Screwworm. To ensure timely and effective communications, this new unified website will be a one stop shop for all screwworm related information and will help our stakeholders be better informed as new information comes available," Rollins said. "We are grateful for the robust interagency collaboration, and we continue to work every day with our state and industry partners to implement our screwworm plan. This is a national security priority

and it has the full attention of our team."

Screwworm.gov has targeted resources for a wide range of stakeholders including livestock producers, veterinarians, animal health officials, wildlife professionals, healthcare providers, pet owners, researchers, drug manufacturers and the general public. It also has the latest USDA-verified information on cases and response activities in Mexico and U.S. preparedness efforts.

The U.S. One Health Coordination Unit for NWS, co-led by USDA, the Centers for Disease Control and Prevention, and the Department of the Interior, is actively working to ensure the United States is prepared should NWS be detected here.

This new site was built with customers in mind and will help all visitors to the Screwworm.gov website, whether they are protecting their herds, traveling internationally with or without pets, endorsing health certificates, conducting research, seeking answers

to questions, or looking for other ways to help. USDA will continue to work with our partners to update and enhance this site to ensure it has the latest information and updates.

Indiana income

FROM PAGE 1

cline, with egg receipts projected to fall 38 percent. Hog receipts are expected to drop 3 percent, while dairy receipts are projected to increase 2 percent.

"For some corn and soybean farmers, the 2026 crop year could be the third or fourth consecutive year with negative margins," Davis pointed out. "Farmers have been cutting costs, and this trend will likely continue. However, the easiest cost savings have already been achieved. The harder cost savings involve machinery management, decisions on cash rental rate bids, and finding savings in the farm-family living expense budgets."

He said farmers should fine-tune their 2026 enterprise and cash flow budgets. They should develop a pre-harvest and post-harvest marketing plan with pricing objectives and quantities priced at each objective. The marketing plan, Davis said, will help farmers manage their decisions without letting bullish emotions or bearish fears drive them.

"The study uses state-level sector analysis which masks the farm-level

financial impact," he said. "For example, a diversified crop/livestock farm is weathering the storm better than a farm only producing row crops. Most farms specialize in a single enterprise, such as corn/soybeans or hogs, rather than being diversified across multiple enterprises. Currently, the crop-only farms are feeling financial stress."

"Young and beginning farmers who rent a larger percentage of their land base to grow their business are under greater stress than those who own a large percentage of their land base. Business growth includes machinery debt as farms increase the field capacity of their machinery. A growing farm may also have a growing family with living expenses that are not easily curbed."

Similar reports were also prepared for Illinois and Iowa. Illinois net farm income is projected to increase 21 percent to \$6.25 billion in 2025, and fall 28 percent next year. In Iowa, net farm income is expected to rise 76 percent to \$12.32 billion in 2025. Next year, it is projected to drop 24 percent.

Nationally, net farm income is projected to be \$179.85 billion in 2025, up 41 percent, the report said.

Harvest season wraps up with drier conditions across region

By DOUG SCHMITZ
Iowa Correspondent

COATESVILLE, Ind. – Harvest in west central Indiana was fast and furious this fall, according to Coatesville, Ind., farmer Mark Legan, after receiving only half an inch of rain in both August and September.

“After a wet start and ample moisture through July, soybeans were five to seven bushel per acre off our five-year average, and corn was right at the five-year average,” he told Farm World as he wrapped up the 2025 harvest season. “Overall, better than we were anticipating. Soil moisture until recently has

been very dry. A few recent rains have helped replenish top soil moisture, while subsoil remains dry.”

In its final Crop Progress Report for this year, released Nov. 24, the USDA said the U.S. soybean harvest is officially complete and the corn harvest is nearly finished at 96 percent to 97 percent complete. Winter wheat planting is 97 percent complete, with emergence at 87 percent, cotton harvest at 79 percent complete, and sorghum harvest at 91 percent complete.

Justin Glisan, state climatologist of Iowa, told Farm World, “Much of the Ag Belt is experiencing drier conditions, and have had drier conditions through much of fall. This is reflected in drought expansion across segments of (the Midwest and the Appalachians) region. Soil moisture, both top and sub-, have been trending drier as well.”

He said, “Drought and abnormal dryness span much of the eastern Corn Belt, with D2 (severe drought) to D3 (extreme drought) conditions from eastern Illinois to northwest Ohio. This swath represents the driest parts of the Ag Belt.

“There are also pockets of D1 to D2 conditions across much of Minnesota, Wisconsin, and Michigan,”

Above: Iowa farmer harvesting soybeans.

he added. “Portions of the western Corn Belt have fared better, with pockets of D1 (moderate drought) in Iowa, Nebraska, and South Dakota.”

The report said in Indiana, corn harvested was 97 percent complete, winter wheat planted was 94 percent complete, and winter wheat emerged at 77 percent. In Illinois, corn harvested was 99 percent complete, winter wheat planted was 98 percent complete, and winter wheat emerged at 87 percent.

In Michigan, corn harvested was 92 percent complete, winter wheat planted was 100 percent complete, and winter wheat emerged at 99 percent. In Ohio, corn harvested was 98 percent complete, winter wheat planted was 99 percent complete, and winter wheat emerged at 97 percent.

In Kentucky, corn harvested was 99 percent complete. In Tennessee, corn harvested was 99 percent complete, and cotton was 92 percent complete. In Iowa, corn harvested was 99 percent complete.

Glisan said outlooks into the middle of December show higher probabilities of colder temperatures from the High Plains to the Appalachians: “On the precipitation side, there’s a bullseye of drier chances centered on Iowa, and stretching into Missouri, and many of the bordering states. There are higher chances of wetter conditions from the eastern Corn Belt to the Appalachians.”

The next weekly USDA Crop Progress Report is slated to be released in early April 2026, the agency said.

US/China trade remains slow

Traders are becoming increasingly disappointed in the lack of Chinese business since the recent trade agreement was announced. China's minister of commerce has now stated China wants to do more business with the U.S., but wants "a competitive price, good quality and sufficient supply" from a soybean trade partner. Price is the hang-up for U.S. soybeans

MARKET ANALYSIS
By Karl Setzer

as tariffs make ours the most expensive going into China. China has picked up its buying pace recently, but not consistently. China has agreed to buy 12 million metric tons of soybeans from the U.S. this marketing year that ends next August.

It is no secret China has been absent from the U.S. soybean market this year, but their buying from other sources has been quite active. This has led to record soybean stocks in China, with a port inventory reported at 10.3 mmt on Nov. 7. This compares to last year's 3.6 mmt. Soybean crushers are also reporting a soybean inventory of 7.5 mmt, the highest volume since 2017. This has started to limit China's soybean appetite from any source, especially the U.S. since we are the highest priced source in the global market.

Tariff uncertainty is weighing on all export trade as the odds of the Supreme Court supporting President Donald Trump's tariffs is falling and now below 25 percent. A bigger question is if these tariffs are deemed illegal, will the U.S. have to repay the \$200 billion in tariffs it has already collected. Importers are hesitant to book excessive volumes of U.S. commodities with the possibility of these fees being removed.

The state of the U.S. economy is becoming more of a market factor. Labor data shows U.S. layoffs in the month of October totaled 153,000, the highest number in 22 years. This brings unemployment data for the calendar year to 1 million, the highest since 2020. These job losses are being credited to increased use of Artificial Intelligence and businesses needing to cut expenses due to elevated tariffs costs. These losses may support further interest rate cuts but will have a considerable impact on consumer spending.

This lack of consumer confidence was noted in the monthly report from the University of Michigan. According to U of M data, U.S. consumer confidence dropped by over 6 percent from a final October reading of 58.6 to a current index reading of 52.3. This decline was the result of a 17 percent decline in personal finances and an 11 percent decline in forward business expectations. The current sentiment reading is 50.3 which is also lower than the October index reading of 53.6. These readings, when combined with statements from the White House that some segments of the U.S. economy are in a recession, are starting to impact U.S. investor confidence.

One positive economic indicator was another decline in global food costs for the month of October. The United States' Food and Agriculture Organization, the group that monitors world food costs, showed an index reading of 126.4 in October, down from 128.5 in September. This

"The Buddy does it!"

— Scott Stempfle

STEMPFLER HOLSTEINS
Maynard, Iowa, 1100 Holsteins
95 lbs/cow/day, 4.65F 3.25P
SCC 120,000

Paul and Jody Stempfle, son Scott and wife Alannah and daughter Britlyn with milking 2-yr-old Stempfle Thunderstruck 4228, going back to the heart of their G family.

"We use Udder Comfort™ on prefresh animals 1x/day for a week before calving, then after calving, 3x/day for the first week of being fresh," says Scott Stempfle, third generation herdsman at Stempfle Holsteins, Maynard, Iowa, where 1100 cows on test make 92 to 97 pounds of milk with a 4.5 to 4.8 fat, 3.2 to 3.3 protein, and 120,000 SCC.

Scott uses the new Udder Comfort Parlor Buddy, a one-gallon, handheld, battery-powered sprayer that makes application simple and convenient.

"The Buddy does it. It's the way to go, compact and light, easy to use, hangs in the parlor, and holds enough product. One pass under the udder, and done."

"Udder Comfort works. Udders are softer with more veination. Milkers fit snugly and squarely, without squawking. It gets fresh cows up and running, so they can be efficient," he says. (Read about farm at qrco.de/Stempfle-Holsteins or scan QR above.)

FROM PAGE 4

was the second consecutive month of declines. Global food costs had been creeping up, but peaked in July at a two-year high, and have now started to decline. This is mainly from a record world cereal grain production estimate of 2.99 billion mt, up 4.4 percent from a year ago. World food costs are now 21 percent off their March 2022 high.

The Brazilian analytical firm Safras updated its corn production figures for the country. Safras is now predicting a 2025/26 Brazil corn crop of 143.56 mmt, up from its prior estimate of 142.49 mmt. This increase was from a bump in the first crop estimate from a prior 25.47 mmt to a current 27.76 mmt. Favorable weather to start the growing season and an increase in plantings are behind the larger forecast. The USDA forecasted a Brazilian corn crop of 131 mmt in the September WASDE report.

China has also revised its 2025/26 production data. Chinese authorities are expecting a soybean crop of 20.9 mmt this year, nearly matching the USDA projection for 21 mmt. The country's soybean imports for 2025/26 were held at 95.8 mmt, well below the 109.4 mmt from the 2024/25 marketing year. China maintains a corn crop forecast of 295 mmt despite considerable flood damage that not only was reported to impact production but also quality. Many private analysts have taken upward of 10 mmt off China's forecasted crop. China is also only forecasting corn imports of 6 mmt this, half of recent years' purchases.

The November cattle on feed report

showed a Nov, 1 U.S. feedlot inventory of 11.7 million head. This was 2 percent less than a year ago and the lowest total in 75 years. October cattle placements were down a large 10 percent from a year ago at 1.99 million head. This was the lowest October placement total on record. October marketings were down 8 percent from last year at 1.7 million head. Even with the U.S. resuming Brazil beef imports, until these inventory numbers increase, cattle values will remain elevated.

Despite record U.S. beef cattle values, the U.S. dairy herd continues to expand. Data shows the dairy herd totaled 9.15 million head at the end of September, an increase of 36,000 head from August. This was also a large 235,000 head more than the U.S. had milking a year ago. As a result, U.S. milk production has increased 4 percent year to year, and pressured that complex over the past several months.

Feeder Cattle:	451(84.1%)	1,429(89.6%)	478(79.5%)
Slaughter Cattle:	82(15.3%)	152(9.5%)	115(19.1%)
Replacement Cattle:	3(0.6%)	14(0.9%)	8(1.3%)

Special Note: Beef Calf: 450.00 per/head.

Compared to last Monday the feeder market was lower with an average quality offering. Feeder steers and heifers were sharply lower across all weight classes with a good supply and moderate demand. Continued negative pressure in the futures market coupled with it being a holiday week limited buyers interests and the premiums they were willing to pay today. Slaughter cows were mostly steady with a good supply and slaughter bulls were 3.00 to 5.00 higher with strong demand for higher yielding individuals. Supply included: 84% Feeder Cattle (38% Steers, 39% Heifers, 21% Bulls, 2% Dairy Heifers); 15% Slaughter Cattle (79% Cows, 16% Bulls, 4% Dairy Cows); 1% Replacement Cattle (57% Stock Cows, 14% Bred Cows, 14% Cow-Calf Pairs, 14% Bulls). Feeder cattle supply over 600 lbs was 55%.

Please Note: The above USDA LPGMN price report is reflective of the majority of classes and grades of livestock offered for sale. There may be instances where some sales do not fit with-in reporting guidelines and therefore will not be included in the report. Prices are reported on an FOB basis, unless otherwise noted.

Explanatory Notes:

Stage (Cattle) - Represents pregnancy stage (O = open; T1 = 1st Trimester, 1 to 3 months; T1-2 = 1st/2nd trimester, 1 to 6 months; T2 = 2nd Trimester, 4 to 6 months; T2-3 = 2nd/3rd Trimester, 4 to 9 months; T3 = 3rd Trimester, 7 to 9 months; T1-3 = all trimesters, 1 to 9 months)

Age - Numerical representation of age in years.

Star of the West Milling Company consolidates 2 mills into new facility

By Stan Maddux
Indiana Correspondent

QUINCY, Mich. — Two wheat flour mills are being consolidated into a new and much larger operation in northern Indiana.

Star of the West Milling Company, one of the largest millers in North America, has announced its flour mill in Quincy, Mich., will close on or about January 1. A mill in Ligonier, Ind., closed a few months ago.

The company built a new mill in Ligonier which has the capacity to produce as much as two million pound of flour per day. In comparison, the mill in Quincy has a daily capacity of 340,000 pounds of flour while the old mill in Ligonier could generate as much as 820,000 pounds of flour a day.

“Our company grew in its ability to make flour but we did it in one facility instead of two,” said Mike Fassezke, President of the company’s flour milling division. Fassezke said the elevator at the mill in Quincy will remain open and continue to store wheat from growers in southern Michigan and northern Indiana until it’s shipped to the new facility for grinding into flour.

The bulk truck washing operation at the mill will also remain open to sanitize the inside of the trailers used to haul wheat after delivery.

The 15 or so workers in Quincy have been offered job opportunities at the new facility and the firm’s mill in Frankenmuth, Mich., where the firm is headquartered, according to company officials.

The company also has mills in Willard, Ohio, and Churchville, New York. Fassezke said a majority of their flour is shipped in bulk to large makers of cookies, donuts, cake mixes and other similar products within a 300-mile radius of each mill.

He said the decision to consolidate the two mills had a lot to do with reducing operating expenses to remain competitive in the industry at a time when consumption of wheat flour in the U.S. has been stagnant over the past several years. “It’s all about efficiencies and scale of operations and that type of thing. If you want to survive, you got to move on,” he said.

Fassezke said money could have been spent on renovating the old mills but given their age and lower production capacities, building a new mill with room for future growth in production was felt to be a better return on the investment.

“We could have remodeled it. We could have put all new equipment in it but you’re still operating in a very, very old structure,” he said. Fassezke noted other flour milling companies in recent years have been replacing their old mills with newer, much larger and more efficient operations. “We’re not the only ones following that strategy,” he said. Fassezke said the new mill being just a one hour or so drive from the one about to close made what was a difficult decision a little easier because it can serve the company’s entire existing customer base.

Star of the West Milling Company began over 150 years ago in Frankenmuth in what was then a small steam-powered mill, according to the company. In addition to flour, the firm is also a supplier of edible beans, food grade soybeans and ready-to-eat wheat flakes.

It also has an agronomy division consisting of more than 30 certified crop advisors that work directly with farmers along with 30 elevators and five bean processing facilities.

INFB awards grants to to promote ag literacy programs

By Michele F. Mihaljevich
Indiana Correspondent

INDIANAPOLIS – The Indiana Farm Bureau (INFB) has awarded grants totaling more than \$9,200 to four 4-H clubs and eight FFA chapters for new or enhanced ag literacy programs in their communities, the organization said Nov. 6.

This year, the annual Ag Literacy Challenge Grant program awarded funds ranging from \$250 to \$1,000, and will be used for activities taking place from October 2025 to August 2026, INFB said. The categories include events that help consumers become better informed about Indiana agriculture, or promote agricultural practices and policies or education efforts that stimulate action in the ag community.

“FFA and 4-H play such an important role in ag education and leadership development opportunities for Indiana’s youth,” Randy Kron, INFB president, said in a release. “The programs highlight a variety of Indiana agriculture and spread awareness of the importance of our industry.”

Hoosier FFA chapters and 4-H clubs could apply for grants of up to \$1,000 during the grant cycle, INFB said. Grant recipients are required

Above: Students from Elkhart County schools learn to plant raised-bed gardens. (photo provided)

to submit a report to INFB after their ag literacy program is complete in addition to presenting their program to their local county farm bureau, INFB noted.

The Rensselaer Central FFA chapter in Jasper County received \$800

Above: Rensselaer Central FFA members prepare meals to be distributed to area farmers during harvest. (photo provided)

for its Fall Harvest Meals program, according to McKenna Wilson, Rensselaer Central High School agriculture teacher. The event, which was completed Oct. 25, provided free meals to farmers during harvest.

“This idea was formulated when

students put their heads together on figuring out how they could thank all of the farmers in the community with more than just a thank you card,” Wilson said. “FFA members understood that the days in the field can be long and meals are not always easy to get lined up. By preparing the harvest meals and handing them out at an easily accessible location, students knew that they could reach farmers near and far.”

Wilson said enough food was prepared for 250 meals, and more than 200 were distributed at two locations – Parr Elevator and the Jasper County Farm Bureau office.

“The remainder of the meals were given to those that helped put on the event,” she noted. “Setting up shop at the local elevator was a great success because truck drivers were able to fill their stomach and haul a box of meals back to everyone in the fields.”

This was the second year for the program. Next year, the group hopes to hand out another 200 meals, Wilson said.

This year, five students helped fix the meals early in the morning and 10 passed out meals at the pickup locations.

“These students certainly gained networking skills,” she said. “When we started, everyone was too shy to pass any meals out and by the end of the day it was a competition to see who could give out the most.”

“Getting out in the community and becoming familiar with businesses is certainly an important thing for these young kids to do, which is why continuing these community outreaches are important for our FFA chapter.”

With two Ag Literacy Grants and additional support from the Elkhart County 4-H Club Council, the county’s 4-H program received \$2,500 for its elementary school garden and camp program, said Corey Sharp, the county’s 4-H youth development Extension educator.

“The gardening activities provide a great experience and allow the kids to learn about plant science, gardening techniques, food supply and production systems, and entrepreneurship,” he said. “We want the kids to have a better appreciation of locally grown foods as well as the importance of our local farming community.”

“The gardening activities offer students a rich, hands-on learning experience. Our goal is to help students develop a deeper appreciation for locally grown food and a better understanding of the vital role our local farming community plays.”

The next garden program will begin in January and conclude in July, Sharp said. Students will start by planting seeds and caring for their plants throughout the spring, leading into hands-on activities during summer camp, he said. The program will end with the students submitting their garden projects for judging at the Elkhart County 4-H Fair.

Students at St. Vincent DePaul School and Mary Daly Elementary participated in the gardening programs this past season. Both sites used indoor greenhouses to start their plants.

St. Vincent students and volunteers built and planted three raised garden beds, Sharpe said. At Mary Daly, students created their own individual container gardens, which they took home.

The Ag Literacy Challenge program began in 2021, and evolved into its current format last year, said Annie Romine, INFB youth engagement coordinator. Over the last two years, INFB awarded nearly \$19,000 to Indiana FFA chapters and 4-H clubs.

Warsaw couple named KFB 2025 Outstanding Young Farm Family

By DOUG GRAVES
Ohio Correspondent

WARSAW, Ky. – Big successes can come from small beginnings. Just ask young farmers Taylor and Hannah Jones of Gallatin County, Ky.

Fifteen years ago (and just two years out of high school) Taylor developed a small business plan for locally grown tomatoes. It was part of a class project while he was in college. The couple now manages a diversified operation in northern Kentucky, producing row crops, beef cattle, hemp and yes, tomatoes. Their community-supported agriculture (CSA) and home-delivery program supplies fresh produce and beef to thousands of households across the state each summer.

Their efforts haven't gone unrecognized as Kentucky Farm Bureau (KFB) presented the couple with its 2025 Outstanding Young Farm Family Award.

This annual award recognizes a young couple or individual who demonstrates excellence in agricultural management, innovation and leadership, while maintaining strong community engagement and active involvement with the farm bureau federation.

For Taylor and Hannah, it wasn't always easy.

"We've faced plenty of setbacks and had to get creative more than once," Taylor said. "But every challenge taught us how to adapt, how to make better decisions and how to build something that lasts for our family and our employees."

The couple wear many hats. They manage everything from data analysis and spreadsheets to coordinating daily worker schedules and operating farm equipment, including the combine harvester.

Over the past decade, the couple has grown their business steadily, creating local employment opportunities and demonstrating a commitment to innovation and long-term sustainability.

"We farm because we love doing it, we love putting seeds in the ground, we love producing a crop and most of all we enjoy managing the chaos so that in the end everything turns out OK," Taylor said.

The Joneses say hemp is their largest type of enterprise, along with a lot of beef cattle. But their production of produce reigns supreme on the farm, with wholesale watermelons and wholesale tomatoes atop the list.

"From all the produce we started our home delivery business," Taylor said. "We began with produce and eventually started advertising freezer beef.

"We know we're providing good food and that's a good feeling, but it's not the same feeling as when you deliver it to someone's doorstep or into their kitchen. There's a lot about farming that makes you feel good about what you're doing."

Hannah added, "There's nothing like producing something you're proud of."

Looking back, Taylor built on the traditional farming knowledge passed down from his grandfather, who raised tobacco and cattle. Taylor combined those roots with the technical and entrepreneurial skills he gained while earning a degree in agricultural education.

Hannah, who holds degrees in exercise science and nursing, joined Taylor after their marriage in 2020. Together they have built a thriving family farm while raising two daughters.

(Warsaw continued on page 14)

Three-Day Kraft auction drew bidders to farm classics and collectibles

By William Flood
Ohio correspondent

VALPARAISO, Ind. — Kraft Auction Service drew attention November 13–15 during its huge three-day, third annual fall antique truck and tractor auction. Held at its Valparaiso facility, each day brought a fresh lineup - spanning vintage farm machine literature and memorabilia, antique tractors, vehicles, and even quality farm toys.

Things opened Thursday, with an online-only session featuring antique/vintage machinery literature and memorabilia. More than 500 lots were offered,

including dealer catalogs, instruction manuals, ag-themed postcards, advertising, and a small selection of parts.

Bidding on the literature was noteworthy. An early-1900s Huber “Light 4” pamphlet, “The Foundation of Tractor Dependability,” brought \$200, while a 1971 John Deere dealer service binder scored \$110. A set of nine IH parts catalogs covering Farmall, International, and McCormick machines also grabbed \$110, showing these historic reference materials still hold plenty of appeal.

Much of the literature sold for dou-

Ross County 4-H tops in "Fight Hunger, Stock The Trailer" competition

By DOUG GRAVES
Ohio Correspondent

CHILlicothe, Ohio — This past summer, 4-H Clubs throughout Ohio collected a record-breaking 448,827 pounds of food to donate to more than 60 food banks across the state, all thanks to the "Fight Hunger, Stock the Trailer" competition. This program encourages youth to collect non-perishable food items and donate them to local food banks.

Competition in the state was divided by regions: South Region, Northeast Region, East Central Region, West Central Region and Northwest Region. The top county 4-H program in each region received \$5,000. Second in each received \$1,500 while third place in each region received \$500.

This year's overall winner was Ross County 4-H, which collected 122,640 pounds of food over the summer. Ross County competed in the South Ohio Region. Clermont County was second in this region while Brown County finished third.

That 122,640-pound total shattered expectations by Ross County 4-H leaders.

"When we first told people we were going for 100,000 pounds of non-perishables and water, people were really skeptical," said C.J. Jones, a member of the Ross County Junior Fair Board. "But when you work together and trust in God and have a lot of good, strong encouraging people around you, it helps a lot."

It also helps to have the county with the state's largest 4-H contingent.

"We're honored and excited to have led the state in the Fight Hunger, Stock the Trailer competition," said Ryan Kline, Ross County 4-H Youth Development Coordinator. "We partially owe this to the strong support from our community and our community partners. It's also attributed to deep roots of tradition here in our county as we have a lot of family members whose parents and grandparents were in 4-H. The tradition side of this has helped Ross County maintain strong programs."

Keeping 4-H in Ross County strong is the task of Kline, who is an alumnus of 4-H in this county.

"Prior to COVID-19, we had 74 4-H Clubs and just over 1,600 members.

Today there are 55 clubs and 1,550 members," Kline said. "We have a large rural base. The population in the Chillicothe area is about 75,000, with just 25,000 residing in the city limits. Plus, we're always looking to grow and we're on the lookout for people who want to start new clubs or help other clubs grow."

Fulton County was tops in the Northwest Ohio Region, gathering 13,860 pounds of food. Second in this region was Mercer County and third was Auglaize County.

"It was truly rewarding to help fill

three local food pantries," said Alysia Callender, Fulton County Junior Fair Board member. "A week before we delivered, the director of one food pantry called to tell us how low their shelves were getting and with the holidays coming up they could really use what we were able to give. To have this impact in three different areas in our county was so extremely rewarding, it was moving to see the Fulton County Junior Fair Board kids load and unload the food knowing that it was helping others in the community."

Lorain (Northeast) and Cham-paign (West Central) counties, both top finishers in 2024, again placed among the leaders in their respective regions, with 52,444 pounds and 18,140 pounds respectively. Stark County and Ashland County finished second and third respectively in the Northeast Region, while Warren County and Greene County were second and third respectively in the West Central Region.

Hartford Independent (East Central) was tops in its region with 35,961 pounds. Guernsey County and Muskingum County were second and third respectively in this region.

"This initiative highlights the creativity and leadership of Ohio youth while directly supporting families in need," said Melanie Strait-Box, Senior Vice President of Agricultural Lending at Farm Credit Mid-America. "With over 1.8 million Ohioans facing food insecurity, it's inspiring to see young leaders step up and make a difference."

This year marks the fourth consecutive year of record donations, with a 57 percent increase over 2024's total of 286,000 pounds. Since its launch in 2021, the contest has collected and donated more than 950,000 pounds of food.

It is time to start winterizing your cowherd

As winter tightens its grip across the Midwest, now is the time to make sure your beef cows are set up for success – not just to survive the cold, but to thrive. Below are key action items for December that will support calf survival, rebreeding and overall herd health.

1. Test Your Hay – Don't Assume It's "Good Enough"

**BEEF HERD
HEALTH**
BY W. MARK HILTON, DVM

A recent Nov. 14, 2025, article in Farm World by Doug Schmitz reveals a striking finding: the Ohio State University beef team received 180 hay samples, and most were deficient in energy and/or protein. This was primarily due to the first cutting hay being made too late (overmature). This should serve as a red flag for producers: just because your hay looks

"good" doesn't guarantee it meets the nutritional needs of your cows.

What to do:

- If you haven't tested your hay already this season, do it now. Collect representative samples from all hay lots (different fields and cuttings) and send them to a forage lab. There are many videos online that show how to collect a sample.

- Contact your nutrition company, extension educator or herd health veterinarian for help on where to send samples.

- Analyze not just crude protein (CP) but also total digestible nutrients (TDN) or energy measures. These will tell you whether your hay will maintain your cows or leave them in a deficit.

Don't simply go out and buy protein blocks or tubs to supplement the cows. They have their place, but if the hay is low in energy – and overmature hay is usually deficient in energy – adding protein won't help.

If you have a fall-calving herd and you are feeding hay that is low in protein and/or energy, this can lead to abysmal reproductive rates. I have seen forage analysis on mature fescue hay that is poorer in energy than corn crop residue. Testing your forages is a very small investment that al-

ways pays off for your beef business.

2. Focus on Body Condition

For optimal calf survival and re-breeding, mature cows need to be in body condition score (BCS) 5.5-6 heading into and throughout the winter. Because bred heifers are still growing, having them in BCS 6.5-7 is recommended. Under-conditioned cows (BCS < 5) are more likely to have weak calves, delayed estrus, or even fail to breed back.

Action steps:

- Assess BCS now. I always suggest having a neighboring beef producer assess your cows, and you do the same for them. The reason is that if you see your cows every day, you won't see a slow change in their BCS.

- Based on hay test results, calculate how much supplemental feed is needed to bring under-conditioned cows to the correct BCS.

- If energy is lacking in your forage, consider energy-rich supplements (grain, byproduct feeds) rather than relying solely on protein tubs.

3. Prevent Lice Infestation During Winter

Winter is prime time for lice buildup, which can stress cows, reduce condition, and lower immune function.

Prevention tips:

- If you haven't already, pour your cows to prevent lice now. The ideal time in our area is around Thanksgiving.

- Use a product with an insect growth regulator (IGR). Your herd-health veterinarian can give recommendations on the ones that contain an IGR.

- Pour from the poll back to the withers and then from the tailhead to the middle of the back. If you miss covering the area from the withers to the middle of the back, that is fine. Lice tend to be near the head, shoulders and tailhead. Be sure to get the product down on the skin. Spraying the product on the cow's side as she runs past you is not adequate.

4. Pregnancy Check

If you have a spring calving herd and you have not pregnancy checked yet, "Get 'R Done." An open cow eats your hay and gives you nothing in return. Would you continue to pay an employee who ate three meals a day at your business and never produced any work? Okay, I have young grand-kids too, but you get my drift. We are at record prices in the beef industry. Don't have freeloaders.

Your herd's winter success hinges on being proactive. Testing hay now, focusing on BCS, preventing lice, and pregnancy checking are investments that pay off in better calf survival, earlier re-breeding and long-term herd productivity.

FROM PAGE 10

ters and fostering the same values of dedication, family and faith that shaped their upbringing.

Taylor is a big advocate of Kentucky Farm Bureau. Five years ago, he served as president of the Gallatin County Farm Bureau and was District 6 Young Farm chair. While he admits it is a tough time for farming operations across the country, the need for a strong agriculture advocate is greater now than ever before.

“I’ve learned a lot from the time I have been involved in Kentucky Farm Bureau,” he said. “But the most valuable is, we are at a time when advocacy is as important as the soil we till. The question isn’t, ‘Are you a member of farm bureau?’ but ‘How can you not be a member if you are going to farm?’ The role this organization plays is far too great to be without it.”

The Joneses will be honored at the KFB Annual Meeting in Louisville in December and will go on to represent

Kentucky in the American Farm Bureau Federation’s Young Farmers & Ranchers Achievement Award competition at the 2026 AFBF Annual Convention in Anaheim, Calif.

Second and third place honorees for the 2025 Outstanding Young Farm Family Award are Brandon and Taylor Henning, of Breckinridge County, and Adam and Kelsey Roberts, of Harding County.

To be nominated for the Kentucky Farm Bureau Outstanding Young Farmers award, farmers must meet three criteria.

First, the young farmers must have active involvement in production agriculture. The majority of the farmer’s income must be derived from farming activities. Second, applicants must be between the ages of 18 and 35 and a member of the county farm bureau. Finally, applications must be received by specified deadline, which is typically set by the Kentucky Farm Bureau.

Judges then evaluate the application and conduct an on-farm interview to confirm the applicant’s involvement and achievements in agriculture.

Tennessee revamps its Farmer-of-the-Year program for 2026

By Celeste Baumgartner
Ohio Correspondent

COLUMBIA, Tenn.—The University of Tennessee Institute of Agriculture (UTIA) and Tennessee Farm Bureau Federation have revamped the Tennessee Farmer-of-the-Year program. The program will honor the state’s agricultural history across all three regions of

Tennessee while recognizing the state’s top farmers. “We have been looking for ways to bring even more attention to agriculture and to the good farmers that we have across the state,” said Rob Holland, Director of the UT Center for Profitable Agriculture. “We want to bring awareness to the importance of full-time farmers. We want to recognize farmers who do

an outstanding job on their farm, and we want to reward their commitment to excellence.” From 1990 through 2024, UT Extension honored Tennessee farmers through a regional Farmer-of-the-Year competition. Beginning in 2026, Tennessee Farm Bureau and UT Extension have collaborated to recognize outstanding farmers from East, Middle, and West Tennessee, honoring their leadership, innovation, and contributions to the state’s agricultural prominence. From these three regional honorees, one exemplary producer will be named Farmer-of-the-Year. The Tennessee state flag has three stars, and those three stars represent the three Grand Divisions of the state, East, Middle, and West, explained Lee Maddox, Director, Communications Div., TN Farm Bureau Federation. “There are some subtle differences in what the agriculture economy is in each division, but you can be sure that all 95 counties in Tennessee have some type of agriculture,” Maddox said. “Each county has some cattle and row crops.” Entering the contest will be through an application process, Holland said. Farmers will be asked to send in a thorough application about their farming operation, their background, and what they do. The selection committee will review those applications and select the three Grand Division winners. The committee will pay an onsite visit to those winners and then select the Farmer-of-the-Year. “It is important to recognize our farmers,” Maddox said. “It is our most important industry in the state: it is really the most important industry in the country. Our farmers produce the good food, fiber, and fuel that we as Americans completely depend upon and enjoy. “We are proud to partner with the

university and look forward to how this program continues to elevate our most important industry,” he said. “We are looking for somebody who is dedicated to that job of protecting the natural resources, of looking at innovative ways to produce food, fiber, and fuel, and someone that enjoys doing this for a living.” Applications to be named Tennessee Farmer of the Year are now open and must be submitted no later than March 1, 2026. Forms and complete details are available online at the website tnfarmbureau.org/tennessee-farmer-of-the-year. Applicants must be at least 21 years old and must claim a crop, livestock or production enterprise constituting a full-time farm operation as their primary source of income. Regional finalists will be selected following the close of nominations. The overall state winner will be named following farm visits by a steering committee of UTIA and Farm Bureau representatives, as well as representatives from affiliated agencies including Tennessee State University and the Tennessee Department of Agriculture. Two regional finalists will each be awarded a cash prize of \$5,000, and the remaining finalist will be named the Tennessee Farmer of the Year. The Tennessee Farmer of the Year will receive a Can-Am Defender HD11 XT CAB (value of \$30,000) and an all-expense-paid trip for two to the American Farm Bureau Convention in January 2027. All finalists will be recognized and expected to attend the awards ceremony scheduled for June 13, 2026, in Franklin, Tennessee. The Tennessee Farmer of the Year is expected to make a number of appearances at various agricultural events, including the Tennessee State Fair, UTIA’s annual Ag Day celebration, Tennessee Farm Bureau Annual Meeting, and more.

Above: The revamped Tennessee Farmer-of-the-Year contest will honor the state's agricultural history across all three regions of the State. While ag in those regions may vary, they all have some row crops and cattle.

Northwest Indiana pig farmer discusses labor shortage, changes in hog industry

By Michele F. Mihaljevich
Indiana Correspondent

WEST LAFAYETTE, Ind. – Today’s hog industry is dealing with a shortage of labor and fewer farms, a northwest Indiana pig farmer said recently.

Brian Martin, a fifth-generation farmer, talked about the industry and how things have changed over the last 30 years or so during the Nov. 18 Purdue Commercial AgCast.

He said labor is the industry’s biggest need.

“Through the last 10 years – and part of that is because the rural workforce (has) a lot of pressure on it, unemployment’s low – (there) seems to be fewer people that truly want a job and that’s resulted in us, the industry, becoming a lot more active in immigrant workers. The visa that is used in our industry predominantly is TN Visa, which is a college graduate from could be Eastern Europe, could be from Africa, could be from Mexico.

“We are 80 percent employed. Our employees are TN Visa, which is a

three-to-five year. And it puts you into a whole different process of finding people. The good thing is you’re finding folks that are looking for opportunity, that want to come to work, that are leaving a place and seeing a broad horizon in front of them.”

Martin said with foreign workers, the farm’s turnover rate has moved from near 80 percent annually to 30 percent over the last six years, and that comes with improved production. Disease events can influence that, he said, but overall, their labor force is much more stable.

“We focus a lot on the number of our team who exceed one year with us,” Martin explained. “We want that number to continually rise, and we’ve seen that be successful through time with them. We work hard at cross training so everyone sees the vision, understands across the system (the) why and how, and what a victory really looks like.”

The biggest change in the pork industry and beyond pork, such as in grain, is the number of farms has decreased through time, he said. Indiana is definitely independent orient-

ed, so farmers would think only in their realm and wouldn’t think about potential partnerships outside of just being independent folks, Martin said.

“I’ll give credit to dad and folks ahead of me, as we think collaboratively. Here’s a good example, I was 17, dad went to his neighbor and said, ‘I don’t want to plant this year. Let’s partner and you provide this, I’ll provide that, and we’ll do it all together.’ Same idea as what we’ve done in pig farming through the years is look for wonderful partners, grow in it and then feed off of the strengths.”

Consolidation has made the industry smaller, Martin noted. It has become a small enough industry that if you name the top 40 companies, those in the industry know all those names. Producers would know someone in every company out there; they have connections, he said.

The network is smaller and people know each other by reputation, Martin said, adding collaboration is pretty easy, which is a nice thing about it. That connects people much differently than it did 30 years ago, he pointed out.

Martin offered advice to students who might be interested in working on a hog farm or potentially owning one in the future. He recommended trying a broad spectrum of things to better find their comfort spot in what they want to do.

“So I guess ultimately I’m saying diverse internships for kids while they’re in school,” Martin said. “(They should take) opportunities to establish as many and broad relationships as they can, so knowing lots of people. (Purdue’s job fairs) are obviously an opportunity to be exposed to big industry, from drug companies to packing companies to production companies, so that there’s plenty of diverse opportunity to meet people, set up different experiences, and then find the one that clicks, or the ones that click, and go do it.”

HALO VRT
VARIABLE RATE TILLAGE

REVOLUTIONIZE SOIL MANAGEMENT

Salford’s HALO VRT adapts to your soil’s needs. Adjust blade angles hydraulically from 2 to 15 degrees, changing to meet varying soil conditions from field to field and season to season.

The new 15-foot model is ideal for tractors between 200-300 horsepower. Add Salford’s 56N applicator to seed cover crops across all acres or protect waterways, and erodible soils.

Salford - Innovation from the ground up.

Three-Day

FROM PAGE 11

ble digits, including an Allis-Chalmers MD5 dozer operator's and repair manual that hit \$50. Later, a John Deere 4320 tractor technical manual hit \$45. Bids in the teens won a trio of Aultman-Taylor postcards profiling 30-60 gas tractors (\$17.50) and an instruction book for Minneapolis Steel & Machinery Twin City 12-20 and 20-35 tractors (\$15). Single-digits grabbed items like a six-piece set of JD operator's manuals (\$8) and a double-sided Allis-Chalmers No. 7 side-delivery rake & tedder advertisement (\$5).

On Friday, it was farm toys and memorabilia, with both live and online bidding available. Over 1,000 lots crossed

the block, including a rare new-in-box Toy Tractor Times 25th Anniversary Edition 1/16-scale AgcoStar 8360 4WD tractor with floater/fat tires, which hit \$2,400. Four additional diecasts sold for four figures, including a boxed 1/8-scale Deere 4020 diesel wide-front (\$1,500) and two limited-edition 1/16-scale Die-Cast Promotions Big Bud 16V-747 4WD tractors (\$1,500 each).

Three-figure offers scored stand-outs like a used Lincoln Toys Oliver 77 wide-front that reached \$450, and a new-in-box 1/16-scale Ertl International 7488 dealer edition at \$300. A unique scratch-built metal and wood Advance Rumely steam engine tractor captured \$275.

Even with winning bids below \$100, buyers snagged quality pieces. A good-condition brass 1/16th Scale

Models steel-wheeled Farmall M, part of the Joseph Ertl Collector Series, went for \$80. A 1/16-scale SpecCast Allis-Chalmers Model K crawler in its original box pulled \$50, while a good-condition 1/16-scale SpecCast Oliver 880 narrow-front went for just \$15.

Saturday marked another shift, with a "drive-thru" live auction alongside on-line bidding on a wide array of antique and vintage tractors, collector trucks, antique cars, pedal vehicles, signs, and other advertising.

A total of 455 lots were offered, led by a \$100,000 offer for a 1910 Hart-Parr Model 22-45. This rare, running survivor - a standout of early tractor history - featured a two-cylinder hit-and-miss engine, single forward and reverse speeds, belt pulley, drawbar, buzz-coil battery ignition, canopy, and reinforced heavy-duty wheels and gears.

Coming in second at \$47,000 was a 1972 International Harvester 1468, powered by a rebuilt V8 diesel and new torque amplifier. The machine featured a 4-speed transmission with high/low ranges, 540/1000 PTO, dual hydraulic remotes, 3-point hitch with top link, drawbar, chrome stacks, front/rear weights, easy on/off steps, and many new components.

Less meteoric bids won machinery like a 1934 Oliver Hart-Parr 18-28 Orchard, which sold for \$10,500. Fully restored in 2006, it featured a rebuilt 4-cylinder gas engine, 3-speed transmission, orchard fenders with front-wheel covers, model-correct magneto and carburetor, rubber on steel wheels, and a custom canvas cover. A 1959 Oliver 770 diesel Wheatland with only 33 post-restoration hours got \$6,500. Powered by a 6-cylinder engine and 6-speed transmission with power booster for 12 speeds, it included a 540 PTO, hydraulic remotes, drawbar, and new tires.

Ag machines weren't the day's only draw, as classic vehicles were also on the block. Leading the group was

a 1971 Chevrolet Blazer "restomod," which drove off for \$44,500. Powered by an LS 5.3L V8 with a 700R4 4-speed automatic, the highly customized restoration featured a converted 1968 front clip, limited-slip rear end, 3.08:1 final drive, 4-wheel disc brakes, and modern touches such as Omega Kustom digital gauges and Riddler wheels.

An original collector-grade 1996 Ford Bronco XLT with just 37,500 miles went for \$39,000. Powered by a 5.8L EFI V8, 4-speed automatic, and factory 4WD with automatic locking hubs, it featured original green two-tone paint and matching removable hardtop - one of only 44 with that combination. Well-maintained, it included complete service records and a deluxe Marti Report.

Other classics attracted offers under \$10,000, including a running-condition 1934 Chevrolet 1.5-ton stake bed truck with 31,142 miles, an inline six and manual transmission, that hammered at \$6,500. A 1983 Ford F150 XL 4x4 with 76,000 miles left for \$4,500. That was powered by a 400HP 351 V8 installed in 2017, with a Jasper remanufactured automatic transmission added in 2025. Well equipped, it sported factory 4WD with automatic locking hubs, dual gas tanks, and amenities like power steering, power brakes, and cruise control.

Saturday also presented an opportunity to snag a special holiday gift, with more than 80 quality pedal vehicles available. Those included a Hoover International T-340 Crawler by Hoover Promotions netting \$3,500, and a custom John Deere pedal crawler with blade (one of only 5 built) finished at \$2,500. Others sold from \$100 for a vintage AMF "Big 4" chain drive wide-front to \$2,000 for a Caterpillar pedal dozer with a custom flame paint job.

Taken together, the three days - spanning literature to machinery - reflected current market interest and where values continue to stay strong.

Above: Farm toys drew solid bids on Day 2, including this unopened 1/16 Ertl John Deere S780 combine, which brought \$850.

ALERT!

ALERT!

ALERT!

Beware of text & phone solicitors. Don't be a victim.

ALERT! If you get a TEXT message from anyone about your equipment, it's most likely a fraud. BEWARE OF JIM BROWN, NATIONAL VEHICLE REGISTRY, 531-242-5967, JOSHUA BROWN & MICHAEL BRYANT, 912-771-5495, 434-226-4602 (NC)!!!

They will send you a check that appears to be good, but overpays to the amount of what it costs to pick up equipment, and later wants a wire sent to them through Walmart because they now will pay the pick up company. Their check comes back bad after a few days, and the Walmart wire cannot be reversed. They have been reported to the Federal Trade Commission (FTC) and the Federal Bureau of Investigation (FBI). ALERT!

If you are contacted by a company called National Marketing or Ultimate Market Place from Omaha, Nebraska and others, please be careful. Farm World has been alerted about representatives of Boese Media Marketing, Heartland Media Group LLC, National Marketing & Ultimate Market Place, Sgt. Christopher (TX), Ryan (IA) anyone requesting transaction with **PAYPAL** account and others claiming that they will work for a brokerage or leasing company that matches buyers and sellers together and offers financing to buyers. For \$99-\$400 dollars they claim they have already brokered a buyer for the equipment, and want a credit card over the phone to begin the process. As time goes on, nothing happens, phone calls are not returned, and the equipment is not sold. We have heard from over 400 people, and have filed a complaint with both the Secretary of State and the Attorney General in Nebraska. If you have any experience with this company, please contact Consumer Protection Mediation Center 800-727-6432. Also we would like to hear from you. Please call 1-800-876-5133 x 302 and ask for Gary.

A scammer will often try to pressure you into making a quick decision and to pay up front.
These are warning signs that should not be ignored!

REMEMBER: If a deal is too good to be true, pass. Do not be influenced by a sense of urgency.
DO NOT GIVE YOUR CREDIT CARD OVER THE PHONE.

At Flaig Lumber Co, we believe in enhancing your outdoor experience by providing top-quality products for your decking, railing, outdoor cabinets, poly panels, pergolas, and more. Located in New Madison, we proudly serve the surrounding areas, bringing a touch of elegance and functionality to your outdoor spaces.

Free Estimates for Decking, Railing, Cabinets, Poly Panels and more!

OUR PRODUCTS:

Decking

Transform your outdoor area with our premium decking options. Whether you prefer the timeless appeal of traditional wood or the low-maintenance durability of composite decking, we have the perfect solution to suit your style and needs.

Railing

Add safety and style to your deck or porch with our wide range of railing options. From classic wood designs to sleek and modern metal railings, we offer choices that will complement any outdoor setting.

Cabinets

Upgrade your outdoor kitchen or entertainment area with our weather-resistant outdoor cabinets. Crafted to withstand the elements while maintaining a beautiful appearance, our cabinets provide ample storage and functionality for all your outdoor gatherings.

Poly Panels

Create privacy, shade, or wind protection with our versatile poly panels. Available in various sizes and colors, these durable panels offer endless possibilities for enhancing the comfort and aesthetics of your outdoor space.

Visit Flaig Lumber Co today to explore our extensive selection of decking, railing, outdoor cabinets, poly panels, pergolas, and more.

Thanksgiving Dinner 5 percent lower this year from 2024

By DOUG SCHMITZ
Iowa Correspondent

WASHINGTON, D.C. – According to the American Farm Bureau Federation (AFBF)'s 40th Annual Thanksgiving Dinner Survey, the cost of this year's feast was 5 percent lower from 2024, marking the third straight year of price declines.

"Our members have been reporting prices for 40 years," Faith Parum, AFBF economist, told Farm World. "The largest change (over the years) is most of them shop online now. Our survey lets the shopper decide if they want to visit in-store, or they can navigate to their local grocery store of choice to look up the items. Other than that, it is the same basket and quantities."

The annual survey provides a snapshot of the average cost of Thanksgiving staples that make up a classic holiday feast for 10, which is \$55.18, or about \$5.52 per person, federation officials said in a Nov. 19 news release.

"This is a 5 percent decrease from 2024," officials said. "Three years of declines don't fully erase dramatic increases that led to a record-high cost of \$64.05 in 2022. The centerpiece on most Thanksgiving tables – the turkey – dramatically decreased in price, which helped bring down the overall cost of dinner.

"The average price for a 16-pound frozen turkey is \$21.50," officials added. "That is \$1.34 per pound, down more than 16 percent from last year.

While the wholesale price for fresh turkey is up from 2024, grocery stores are featuring Thanksgiving deals and attempting to draw consumer demand back to turkey, leading to lower retail prices for a holiday bird."

According to the survey, AFBF volunteer shoppers checked prices the first week of November. Grocery stores often feature whole turkeys at even lower prices in the days leading up to Thanksgiving. In fact, the most recent USDA Agricultural Marketing Service data said the average per-pound feature price for whole frozen turkeys declined further during the second week of November.

"It's encouraging to see some relief in the price of turkeys, as it is typically the most expensive part of the meal," Parum said in the news release. "Farmers are still working to rebuild turkey flocks that were devastated by avian influenza, but overall demand has also fallen. The combination will help ensure turkey will remain an affordable option for families celebrating Thanksgiving."

The shopping list for AFBF's survey included turkey, stuffing, sweet potatoes, rolls, peas, cranberries, a veggie tray and pumpkin pie with whipped cream, all in quantities sufficient for 10 servings, officials said. Half the ingredients in the survey declined in price, including dinner rolls and stuffing. Low wheat prices helped bring down the cost of items requiring flour, officials added.

Above: Zippy Duvall, AFBF president, said despite modest declines in the cost of a Thanksgiving meal, food prices are a real concern for many families, including in rural America. (courtesy of the Iowa Turkey Federation)

The survey showed other items such as 14 ounces of cubed stuffing mix was \$3.71 (down 9 percent); two frozen pie crusts: \$3.37 (down 8 percent); and one dozen dinner rolls, \$3.56 (down 14.6 percent). But the survey showed items like fresh vegetables and sweet potatoes increased: a veggie tray was up more than 61 percent and sweet potatoes were up 37 percent, with natural disasters partly contributing to the increase.

For example, North Carolina, which

is the largest grower of the nation's sweet potatoes, suffered hurricane damage, according to the survey: "We've seen a reduction in prices for about half our items," Parum told Farm World. "Frozen turkey prices are down, and this year, the turkey is the smallest share of the bill than ever before. This shows that our sides are moving more into the spotlight.

Turkey dinner

FROM PAGE 1B

“In that vein, we see high volatility of produce prices,” she added. “Sweet potatoes and the veggie tray are up this year due to natural disasters, transportation costs, and labor shortages. However, because these prices are volatile, shoppers may see lower prices in their own stores.”

In recognition of changes in Thanksgiving dinner traditions, officials said the AFBF survey also included boneless ham, Russet potatoes and frozen green beans, in an expanded menu. Adding these foods to the classic Thanksgiving menu increases the overall cost by \$21.91, to \$77.09.

The survey, however, indicated the continued shortage of farm workers and rapidly increasing farm wages also played a role in rising produce costs: “It’s important to note that fresh vegetables and potatoes are traditionally low-cost items, so an increase of just a few cents can dramatically affect the cost change percentage year-to-year,” officials said.

This year’s national average cost was calculated using surveys completed with pricing data from all 50 states, and Puerto Rico. AFBF analysis revealed regional differences in the cost of the meal. The cost for the classic Thanksgiving meal was the most affordable in the South at \$50.01, followed by the Midwest at \$54.38; the Northeast at \$60.82; and the West at \$61.75.

In addition, the expanded meal (e.g., classic meal plus boneless ham, Russet potatoes and green beans) was the most affordable in the South at \$71.20; the Midwest at \$76.33; the Northeast at \$82.97; and most expensive in the West at \$84.97, the survey indicated.

“We are blessed to live in a country that is capable of producing such an abundant food supply, and for that we should be thankful,” said Zippy Duvall, AFBF president. “Despite modest declines in the cost of a Thanksgiving meal, I know food prices are a real concern for many families, including in rural America.

“We lost 15,000 farms last year because of factors including historically low crop prices, high supply costs and trade uncertainty, which continue to squeeze farmers and ranchers,” he said. “Every farm lost is another step toward consolidation and reliance on other countries for our food.

“We urge Congress to address the challenging economic conditions facing farmers to ensure farm families can continue growing the food we all rely on, not just on Thanksgiving, but every day of the year,” he added.

Turkey survives protecting flock from dog attack

By DOUG GRAVES
Ohio Correspondent

OXFORD, Ohio —A turkey has gone viral after some fowl play involving a dog. Nearly 3.5 million views appeared on TikTok as word about Thomas the turkey survived a dog attack, protecting other animals at a farm near Oxford, Ohio.

Thomas’ owner Cara Zellers says Thomas was bitten twice while protecting the family’s other animals during the attack, including ducks, chickens and his mate Gamora, another turkey.

“Stepped into hero mode. It was fight or flight, and Thomas stepped up to the task,” said Dr. Chantel Raghu, veterinarian and co-owner of Oxford Veterinary Hospital. “Thomas was likely trying to protect ducks and chickens from the dog and was bitten badly in the process.”

“I had just gotten home that day and saw a dog running through our yard,” said owner Cara Zellers. “My first instinct was to search for my two-year-old turkey, Thomas.”

Zellers found Thomas hiding in the garage. The other animals in the yard were safe.

“It was a terrifying time for all of us as Thomas is a special bird to our family,” Zellers said. “He’s a big part of our family as he waits for us at the door when we come home.”

The staff at the veterinary clinic said Thomas was very patient as he was sedated in order to have his wound looked at a few days before Thanksgiving.

“The wound he sustained and how brave and kind he was to us as we were taking care of him...he’s a really sweet animal,” Raghu said.

And seeing a turkey enter the clinic doors was a first for Raghu.

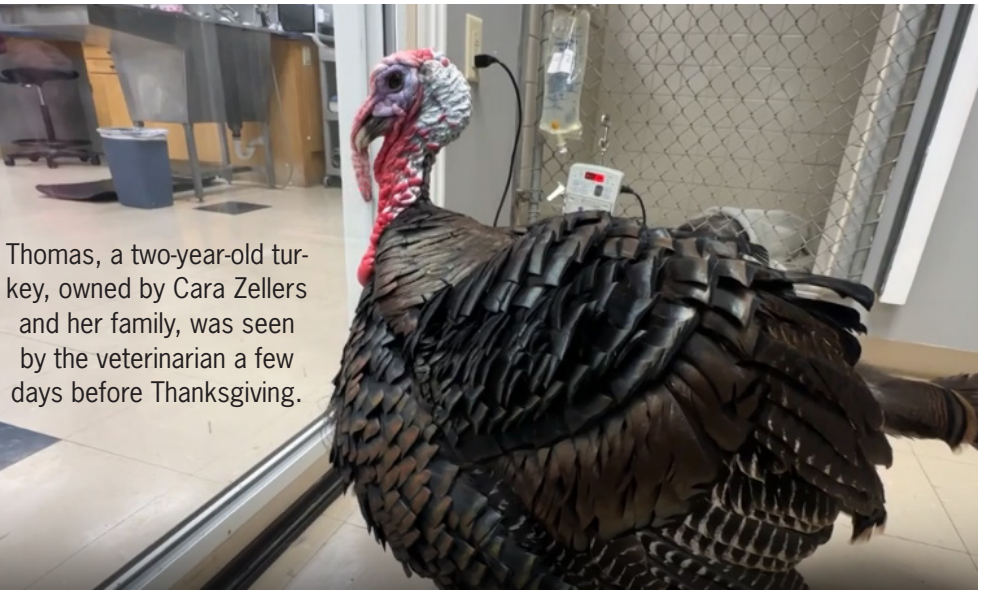

“I’ve had a variety of animals come into my clinic, but this is the first turkey we’ve seen,” Raghu said. “We’ve seen other types of farm animals such as ducks, geese, pigs and chickens. And of course, many dogs and cats. But never a turkey.”

“The biggest worry was that of infection from bacteria, which is why you can’t immediately close up the wound from a dog bite right away,” Raghu said. “Dog saliva contains lots of bacteria. It’s best to flush it out as much as you can to clean it out. We had to make the tissue as healthy as possible before closing the wound.”

“Thomas went back home the day before Thanksgiving,” Raghu said. “He’s doing well and very resilient.”

Thomas has several treatments ahead of him, but Raghu says he should fully recover from these injuries.

“We’re looking forward to taking Tom to Bass Pro Shops to meet Santa Claus later this month,” Zellers said.

Thomas, a two-year-old turkey, owned by Cara Zellers and her family, was seen by the veterinarian a few days before Thanksgiving.

December brings sunset at its earliest time of the year

The Thanksgiving, with its reliable bounty, its reunions, its hours of perfumed air, is over, and the raking, the planting of bulbs, and the digging of root crops are finished for the year. The freezer and pantry shelves are as full as they are going to be: What we have done, we have done; and what we have left undone, we have left undone. — Jane Kenyon

along the 40th Parallel. A secondary front often increases the assault on your homestead between the 11th and the 13th.

Zeitgebers: Events in Nature that Tell the Time of Year: When sunset reaches its earliest time of the year, the brittle leaves of the pear trees fall. This is the time during which the second bloom of forsythia flowers ends, when witch hazel blossoms wither, and the last of the golden beeches, the willows, osage and oaks come down. Even though this is one more week of endings, it is not a week of stasis. Spruces are growing new needles. Caraway and henbit sometimes flower in the sun, and a dandelion or a periwinkle opens in scattered fields and lawns. Fresh chickweed, which sprouted at the end of the summer, is blossoming in warm corners of the woods. Catnip sometimes grows back beside thistle, moneywort, chickweed, wild geranium, leafcup, henbit and yarrow.

Farm and Garden Time: Try to complete harvest of corn, soybeans and sugar beets before the arrival of early winter, which normally storms in with the second December front, bringing the first taste of snow to the Border States and often a major blizzard to the North. The Christmas tree harvest is well underway, and the last poinsettias have come north. In greenhouses and sunrooms, tomatoes sown in July will be getting ripe as December approaches. Marigolds, zinnias, impatiens and other bedding plants saved from the cold may still be flowering.

Mind and Body Time: The danger of Seasonal Affective Disorder increases as

POOR WILL'S ALMANACK
By Bill Felker

The Moon in December
The Moon: The Moon is full on December 5
The Moon enters its last quarter on December 14
The Moon is new on December 20
The Moon enters its second quarter on December 27
Sun Time: On December 2, the Sun reaches its earliest setting of the year in much of the Lower Midwest, and it continues to set at the same time for 12 days.
Star Time: Orion is the most obvious of all the star groups, and around him cluster some of the easiest stars to identify. Leading Orion into winter is red Aldebaran, the eye of Taurus. In front of Taurus, the seven sisters of the Pleiades lie almost in the center of the sky. Above the Hunter's raised arms, Capella is the largest light in Auriga. Above and behind Orion, Castor and Pollux, the brightest stars of Gemini mark the east. Trailing along in the southeast is Sirius, the giant Dog Star.
Weather Trends: The high pressure system that typically arrives at the end of December's first week is a major pivot for severe weather throughout the states

Poor Will

FROM PAGE 5B

the winter period of solar stability (December 5 – January 8) begins, keeping the days short and the amount of available sunlight. Be out of doors as much as possible to maximize exposure to light. The bright flourescent lights of malls and shopping centers may also be helpful.

Creature Time (for fishing, hunting, feeding, bird watching): Cold fronts that usually arrive around December 3 and 8 will be preceded by a dropping barometer, encouraging activity in fish and game. Honeysuckle foliage continues to fall, opening up the undergrowth for hikers and hunters. If you are bird watching, set out additional feeders for suet and fruit as well as for seeds and grains. Keep track of the types of birds that arrive in your yard. Be ready for late and early migrants.

Journal

December 4, 1992: To the woods this afternoon, cloudy, 40 degrees, light breeze: Clover foliage keeping the paths green, with some dandelions, some plantain. Wind in the dry grass, oak leaves rustling, distant crows intermittent, no other birds for the first miles. Then the scream of a robin as though he were frightened or had been attacked.

Moss was still bright beside me, became the dominant green in the woods. A few red raspberry leaves at the top of the hill, an occasional bank of honeysuckle berries. Nettles, protected by wild roses, were growing back in the valley, a foot tall. Top sweet gum seed balls were holding on. Teasel was dark in the dull goldenrod fields.

Osage fruts all yellow on the ground. Pale greens and pastels of the lichens. Then the landscape down the valley: bands of grays and browns above a sky of light stratus clouds. The trees black,

pasture chartreuse: a cross section of the winter, veins of this time. Walnut hulls stained the wood purple. Coming back, I saw a pair of flickers; they screeched then flew west off toward the river. At my summer fishing hole, three tan moths, between half an inch and an inch wingspan, struggled through the cold. I cast my line out there: only one bite.

Today, the pieces of the last season become fragments of a new season, Early Winter, the first season of the new year.

Almanack Literature

The Ohio Coon Dog Field Trials
By Pete Jones, Lynn, IN
My life as a young boy was much different than the lives of most of my friends. Most of them spent Sunday in Sunday School and church. I spent my Sundays working at the Ohio Coon Dog Field Trials.

My dad built an electric generator with a gas engine for power. It would run his sound system in places where there was no electricity available.

My job was to climb trees and help place two large steel speakers in them. I would help string wire from the speakers to the sound systems. Dad could then make announcements about the trials or play music from a recorded player.

The trials were always held in the woods. Men would go about a mile away and drag a sack of coon manure over the ground. They would take the sack up to a tree where a coon would be tied to a lower limb.

The trial would be over when the first dog would tree the coon by looking up at the coon and barking at him.

Yes, there was a lot of money bet on the dogs. The first to tree the coon won all the money for his owner.

The last good thing I remember about the Coon Dog Field Trials was our picnic lunch. It consisted of a pork chop sandwich with green onions, a cold six-ounce Coca Cola and custard pie. I cherish these memories.

Partial scholarships available for Indiana ALP participants

DANVILLE, Ind. — The Indiana Soybean Alliance (ISA) and the Indiana Corn Marketing Council (ICMC), the state's soybean and corn checkoff programs, will again offer partial tuition scholarships for full-time Indiana soybean and corn farmers who are accepted to participate in the Indiana Agricultural Leadership Program (ALP).

ISA board member Chris Eck, a farmer from Boggsstown, Ind., graduated from ALP Class 17, which ran from 2016-2018.

"Getting a scholarship for the Indiana Agricultural Leadership Program was really the first step for me, and it has come full circle because I am now a director on the ISA board," Eck said. "ALP allows the opportunity for both professional growth and networking with successful people in the agricultural world. The program has also connected me to a group of people who have become my lifelong friends. ISA is proud to invest in future farmer leaders."

ISA and ICMC will contribute up to \$1,000 per full-time corn and soybean farmer accepted into the program. ALP is designed to guide Indiana's promising leaders to new levels of leadership skill and to a heightened awareness and understanding of the issues facing our industry.

"We encourage as many corn and soybean farmers as possible to participate in ALP," said ICMC President Tim Gauck, a farmer from Greensburg, Ind.

No autonomous tractor sales in Sweden

Jan Arvidsson is a long-time friend whose father was an IH distributor in Sweden. Jan grew up in the business and has an impressive collection of

International trucks and tractors. He's maintained a friendship with the current Case IH distributor, who has provided me with this update on the Swedish tractor market: It's a significantly different market than the U.S. Electric tractor sales, for instance, are far apart. In the U.S., dairy operations, vineyards and fruit farms have started using electric autonomous tractors, largely because of labor shortages. In Sweden, there are no sales.

Part of the cause of this is legal. Another is the plentiful labor supply. The same lack of demand exists in alternate fuel engines. They are on test in Sweden but not yet on the retail market. Methane power (such as New Holland) is in the test stage only. Alternative diesel demand is growing. However, it is still too expensive to reach large-volume sales. No autonomous sales yet exist in Sweden. Some legal issues must be addressed first. Sweden is a substantial tractor market, however, and has been a very progressive one through the years.

Volvo electric wheel loader
Volvo has released the L90 electric wheel loader, which should be popular in large feedlots. Dedicated electric motors for propulsion and hydraulics enable full available power for both systems. Continuous 4.5 hours of operation is claimed for full load, with 8 hours

55 YEARS AND
COUNTING FROM THE
TRACTOR SEAT
BY BILL WHITMAN

for light-duty operation. US tractor shipments... high point Heritage Iron Magazine recently researched past American tractor shipments at their all-time high. The year was 1951, and the total was 567,446. (It was eight years later before total tractors on U.S. farms would outnumber draft horses.) These high numbers were never again reached. By 1960, the annual total had dropped to 152,878 and never would future numbers go above that.

A huge collection, now smaller
The John Kinzenbaw collection (Kinze Mfg.) on Iowa Route 80 is multi-colored and one of the largest collections in the United States. The unverified estimate I was given is 600. On Nov. 4, the collection became slightly smaller. One-sixth of the collection was auctioned. Most were duplicates. Through the years, he bought tractors at auctions that were nicer than what he already had. He started the collection in 1979, and

Orphaned animals provided comic relief, became part of family

I've been surrounded by a variety of animals my entire life including our turtle who we called Rock because he moved about as fast as one. Our Rock is not to be confused with the gag gift that was popular called the Pet Rock®, which came long after our pet Rock. We got Rock as a baby and he was the perfect pet as we never had to feed him or pick up his poop. Fact is, we only saw Rock about once a year.

It's THE PITTS
By Lee Pitts

sheep to individually name and granted, they were treated more like a commodity than a pet. But there were many creatures that became so special they became part of our family. Nine times out of 10 they were lovable little babies that were handicapped, orphaned or their mother took one look at them and headed for the hills. One of our favorites was Two Car, so named because the leppy calf spent the first few months of his life in our garage. We were leasing a ranch, but we lived about 30 minutes

away, that was unless the bridge was out, which it often was in winter, which meant going to and from the ranch took an hour and a half. So, when Two Car's mother died giving birth to him it became a lot easier to feed him three times a day at our house which was right in the middle of a subdivision. I can only imagine what the neighbors thought when Two Car started bawling in the middle of the night for his midnight feeding. Eventually Two Car became quite the celebrity and everyone who heard about the orphan wanted to have their picture taken as they bottle fed him. When the bottle ran dry, he'd

try to suck their kneecaps off. One little lamb will live forever in our hearts. We never knew what caused Angel to be unable to stand on her own four legs. We'd had lambs do this before only to start walking after a few days, but Angel never did. I made a sling for Angel and hung her from a tree with her feet barely touching the ground. We gave the poor thing a bottle three times a day for three weeks, but we were gradually losing her. Usually I reluctantly took care of euthanizing our dying creatures, but this is the one animal I never could bring myself to do it. So, we took Angel to our friend the Vet and asked if he would give Angel the needle after we'd left. I bet he thought my wife and I were big wimps. To this day I often blame myself and wonder if we'd have given Angel one more week maybe she would have found her footing in life.

People who've never been around a baby pig might think it odd that a person could fall in love with such a creature but then, they never knew Pancakes. We got Pancakes because she was the runt of a big litter and the man who owned her had a hard heart. I guess you could say we saved Pancake's life, but she rewarded us daily with a good dose of comic relief. Not to mention the occasional nightmare, like the time she erupted from under an avocado tree and charged the entire local chapter of the Daughters of the American Revolution as they left the monthly meeting, arms filled with pieces of my mom's cream pies. There was carnage and whip cream everywhere. After such an escape there was only one way we could lure Pancakes back into her pen and that was to bribe her with some of my mom's pancakes.

One of the highlights of my life these days is eat lunch monthly with a rancher I've known since college. Tiny is a big man with an even bigger heart but at our last visit Tiny looked exhausted but with good reason: he had five calves on the bottle.

AUCTION

FARM EQUIPMENT

Wednesday, December 17th • 10:30am

- **2022 Case IH 8250 AFS Axial Flow combine**, RWD, 620/70R42 duals, 750/65R26 rears, power bin ext, folding auger, hyd spout, chopper, chaff spreader, lateral tilt, 1596 eng, 1211 sep

A look at the joys of farming, and how a family dairy operation died

"Barn Gothic: Three Generations and the Death of the Family Dairy Farm" by Ryan Dennis

c.2025, Island Press, \$30, 264 pages

It's hard to ignore a polka-dot hill on a sunny day.

Imagine it: a black cow here, a brown one there, a black-and-white one there and there and there against impossibly green grass with a vivid blue sky. If you can see it in your mind's eye, well, you know. And you also know there's more to a cow than its color, and in "Barn Gothic" by Ryan Dennis, there's more to a farmer than his cows.

He was meant to be a fourth-generation farmer.

When he was 10, Ryan Dennis woke

THE BOOKWORM SEZ
Terri Schlichenmeyer

up before the sun to follow his father to the barn, to milk their cows, help with chores, and spend some time with his dad. He understands now that those mornings were as important to his father as they were to him, that his dad really had no interest in many of the things they discussed then, but he learned about them because Dennis was interested in them.

Their mornings together were also meant to teach: the hope was that one day, Dennis would take over his grandfather's farm right next door on a hill in upstate New York. But then one quick event changed the course of their lives: Dennis's grandfather was working in the milk parlor and fell to the concrete floor, hitting his head,

sustaining a quiet brain injury. A stoic, financially daring man before the fall, his behavior worsened. He began spending money he didn't have.

The family noticed but they thought everything was fine. Rollercoaster milk prices, predatory lending and government policies had always meant that the Dennis men struggled and adjusted. But getting loans for equipment started to become impossible; planting crops, difficult. Dennis went away to college and his father worried that he'd never return to the farm.

The worries escalated when Dennis's father sustained a life-threatening skidder injury, and nearly died. But that pain was nothing compared to the hurt that was to come...

Anybody who's ever been stepped on by a cow knows how it feels: not fun. But trust this: what you'll read inside "Barn Gothic" will stomp your heart just as flat.

Here's a hard, hard story to read, wrapped inside tales that are joyful and awe-struck. Dennis shares the spotlight here with his father, grandfather, neighbors, the land they loved, and the act of farming itself. Readers in the know will recognize the unique pleasures he writes about – tending the fields, harvesting them, and knowing the cows – but they'll also gulp hard at what ultimately happens here. It's an ending that might be altogether too familiar. It will pull you up hard and make you think deeply about the things we do to survive and how we manage to forgive.

"Barn Gothic" is a good heartfelt read for anyone who thinks about our nation's farmers today, or who eats, drinks milk or derives pleasure from a good farm scape along the road. If you're a family farmer now or once upon a time, you'll find it spot-on.

TATE FARMS RETIREMENT AUCTION

Auctioneer Note: The upcoming Tate Farms Retirement Auction represents the complete dispersal of one of the region's most respected and successful farming operations. Since 1978, Tate Farms has stood as an outstanding example of excellence within the agricultural industry, known for its dedication, efficiency, and high-quality standards. All farm equipment, semi-trucks and trailers featured in this auction is one owner, late model, and has been exceptionally maintained to manufacturer's specs. Every piece of self-propelled equipment will be sold with a full tank of fuel and has undergone extensive post-harvest maintenance, ensuring that it is field and road ready for immediate use. The auction will begin at 9:00 AM with smaller items, followed by cataloged equipment at 12:00 Noon. Detailed descriptions, photos, and complete information for all lots can be found online, and bidding is available at www.kaufman-auctions.com and www.equipmentfacts.com. This event presents a rare opportunity for buyers to acquire top-quality, well-cared-for equipment from a truly exceptional farming operation.

Lunch Stand: Available day of auction providing breakfast & lunch items

Santa to visit Apple Farm locations

Santa Claus will be visiting Apple Farm Service locations on Dec. 6 and 13 from 9 a.m. to noon.
“This is one of the most fun events we put on every year,” said Kent Holmes, marketing manager at Apple Farm Service. “For those who have never been to an Apple Farm Service location, you can imagine the wonder on the children’s face as they enjoy looking at all the tractors and combines around the lot. The joy as they talk to one of our Santas. And the fun they have looking through our selection of farm toys while enjoying hot chocolate.”
On Dec. 6 Santa will be at the Botkins, Mechanicsburg and West College Corner stores. On Dec. 13 he will be at the Covington and Washington Court House stores.
Apple Farm Service will offer free printed pictures, hot cocoa and snacks, and craft tables to make ornaments at this free event.
For more information about Santa’s visit, you can visit AppleFarmService.com/Events.

The shortest day of the year coming up Dec. 21

The National Weather Service 8-14 day forecast, ending Dec. 8, called for “likely above” normal outlook for both temperature and an outlook for “leaning above” normal precipitation. Unfortunately, all the weather people I watch are saying the same thing, likely cold and wet for now and most of the meteorological winter of December through February. Even The Old Farmer’s Almanac for their Region 6, (our area of what they call the Lower Great Lakes region) is saying likely snow and cold during these months.

Dec. 21 is the first day of winter but also the winter solstice, the “shortest day” of the year. For Ida, Mich., we will have 9:07:35 of daylight, with sunrise at 7:58 EST and sunset at 5:06pm. The good news is the days then get longer for the next six months until the summer solstice on June 21, when Ida will have 15:13:53 of daylight, with sunrise at 5:59 am DST and sunset at 9:13 pm.

MSU soybean variety trial results are out with the southeast Michigan location in Lenawee County, at the Jason Woods farm, showing

WEEKLY AG UPDATE

BY NED BIRKEY

MSU EXTENSION EDUCATOR EMERITUS

SPARTAN AG

good yields. The Roundup Ready (RR) early trial had yields ranging from 93.8 to 73.1 while the RR late trial had yields ranging from 96.7 to 83.6 bushels per acre. The conventional herbicide trial had yields ranging from 98.1 to 64.9 bushels per acre. Results are available at www.MSUvarietytrials.edu.

Corn variety trial results are now available for the Ohio State location at the OSU OARDC location at Hoytville (think Bowling Green). Very dry weather resulted in lower yields than other northwest trial locations. For early maturity hybrids, yields ranged from 167.7 to 124.7 bushels per acre, and for the full season maturity hybrids, yields ranged from 173.9 down to 105.7 bushels. OSU also publishes a two-year and a three-year summary of hybrid performance and a listing of all the seed fungicide and insecticide treatments and technology traits for the 2025 trial. Search Google for 2025 OSU corn variety trial. Unfortunately, Michigan State discontinued their corn and corn silage trials in 2023.

2026 Illinois crop budgets for corn, soybean and wheat projected by the University of Illinois for a Northern Illinois farm return of -\$64 per acre for corn (following soybeans) and a +\$3 return for soybeans (following corn). There are additional budget projections for highly and lower productive Central Illinois farms and for Southern Illinois. There are many income and expense item variables that can affect individual farms differently than the projections.

Not letting bugs feel at home inside the house can be challenging and maybe non-stop. Common bugs to look for include ants (particularly Carpenter ants), cockroaches, earwigs, flies, house centipedes, silverfish, stink bugs, spiders and boxelder bugs. Tiny gaps around the doors, cracks or holes in the siding and even pets with hitchhiking insects can allow bugs indoor access. Other suggestions include cleaning up the kitchen and under the sink, clean and sweep regularly, dry out damp areas around sinks, dish and clothes washers, not stacking up firewood inside the house or attached garage or even against the house. Ready-to-use pesticides, including baits and aerosols, can create a bug barrier and some are labeled for inside the home around doors, windows, along baseboards, under the sink, etc. Trapping insects in empty water bottles, or even using a fly swatter are possible non-pesticide helps.

Tractor

FROM PAGE 8B

now, almost 50 years later, he sold the duplicates.
The collection is beautifully displayed and worth your visit.

From one extreme to another
Some months back, I told you about my 6th grade after-school job plowing for our neighbor. It was my first experience driving a tractor for field work. I recall the McCormick 10-20 I was driving was very slow. A friend just told me how slow: The 10-20 had 3 speeds: 2 MPH, 3 MPH and 4 MPH. Contrast that with the recently announced New Holland Power Command full-power shift transmission on the T7.270 row crop tractor. Nineteen ratios are available with no break-in drive. The transmission is program-

mable as well, able to automatically shift when speed changes by desired intervals which are preset.
This is quite some progress from the 10-20 over these past 100 years.

This is not an easy year for agriculture. This quote seems timely. “Strength does not come from winning. Your struggles develop your strengths. When you go through hardships and decide not to surrender, that is strength.”
Arnold Schwarzenegger

Paul Wallem was raised on an Illinois dairy farm. He spent 13 years with corporate IH in domestic and foreign assignments. He resigned to own and operate two IH dealerships. He is the author of THE BREAKUP of IH And SUCSESSES and INDUSTRY FIRSTS of IH. See all his books on PaulWallem.com. E-mail your comments to pwallem@aol.com.

Leisurely drive provides majesty as bald eagle snacks on carrion

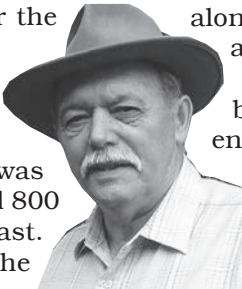

Recently, just north of Moscow on CR 650W, we rounded a bend in the road and interrupted a “royal diner.” The “royal” was snacking away on the remnants of a road-killed raccoon and only hesitated briefly before leaving its roadside fare and taking flight. We had encountered a fully mature Bald eagle. It displayed a full white head and tail with a huge, hooked yellow beak and yellow feet armed with huge talons. As it slowly circled, the white head and tail against its dark body stood out in vivid contrast. It was breathtaking!

I stopped in the middle of the road, and we watched as the awesome bird slowly circled the adjoining field several times at a low altitude impatiently awaiting the departure of the people so rudely interrupting its meal. Not wishing to drive the beautiful bird away from its meal, we slowly started on toward SR 244.

Teen Dies In ORV Accident
Indiana Conservation Officers are investigating an off-road vehicle (ORV) accident occurring Sun-

day evening, November 23 near the Clay-Putnam county line. At 3:51 p.m., Clay County Sheriff's Dispatch received a 911 call reporting a 15-year-old male had wrecked an ORV and was unresponsive near County Road 800 North and Country Road 500 East. When officers arrived on the scene; the initial investigation determined the teen was operating the ORV when the vehicle left the roadway and struck a tree. Despite lifesaving efforts, the teen was pronounced dead on the scene. The incident is still under investigation. The teen was wearing a helmet at the time of the accident.

Firewood Available At McCormick's Creek State Park
The public is invited to cut up and remove certain downed trees at McCormick's Creek State Park for firewood. The trees eligible for firewood have fallen as a result of natural causes or have been dropped by property staff for safety. They are

SPAULDING OUTDOORS
By Jack Spaulding

along roadsides or in public areas such as picnic areas. Permit sales and cutting begins December 1 and ends March 20. The cost of one pickup-truck load is \$10. A load is defined as an 8-foot standard pickup truck bed without any modifications including sideboards. Additional charges will be incurred for a larger truck and trailer load. All proceeds will be used for resource management and restoration efforts at the park, including replacement of trees. A firewood permit must be obtained for each load at McCormick's Creek State Park's office between 9:00 a.m. and 3:00 p.m. EST, Monday through Thursday. Wood may be cut and removed between 9:00 a.m. and 3:00 p.m. EST, Monday through Thursday. Designated areas for wood cutting and removal will be assigned. Firewood cut at McCormick's Creek State Park is for personal use only and cannot be sold.

Black Powder Traditions
Deer muzzleloader season runs from December 6 – 21, and offer hunters a chance to step back in time and embrace the heritage of traditional black powder hunting. The season honors methods passed down from generations, when hunters relied on the skill and patience demanded by a single-shot firearm. Unlike modern rifles, muzzleloaders present unique challenges. Muzzleloader range is shorter, and reloading takes time. It's these challenges making the experience so rewarding. 'till next time, Jack
